

THANK YOU FOR BUYING AMERICAN!

The money in our pockets is important to all of us. You recently made the decision to buy a Bone creeper - likely due to the trusted name, high quality and/or its American manufacturing. In these next few pages, we would like to give you a quick education on how important the money you just spent on purchasing an American product is! Manufacturing in America is an expensive, yet rewarding way of life. The capital expense of setting up a manufacturing facility can be mind boggling. This flier features not only our own facility, production and employees, but also those of the companies that supply us with the materials needed to make the Bone creepers. When you see how many people are supported by your purchase of a creeper, apply what you have learned here to the other American products you buy!

Designed and restored by Dale Adams Enterprises, 1994

WHO WE ARE

Dale Adams Enterprises was started in a Northfield, Ohio chicken coop in 1976 by Dale Adams, who had a goal of getting into automotive restoration. As many businesses do, the company kept expanding through the years and entered into other industries along with the restoration work. In the late 1980s Dale expanded into making thin wall steel tube sleeves for the remanufacturing of power steering racks. In 1994 he put into production an invention he had in his head since the early 70s - the Bone creeper. Dale Adams Enterprises is a family owned business that is a firm believer in the importance of American products. We have gone to great lengths to ensure that every possible component of the Bone creepers is made by American manufacturing in America. The creeper bodies and wheels are all made in our Kent, Ohio facility, as well as all of the assembly, shipping, office work and sales.

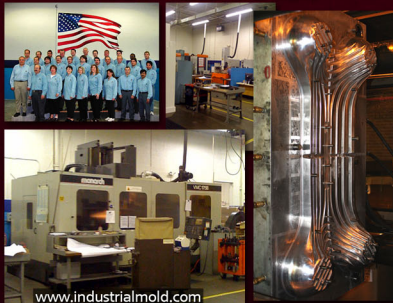

WE USE ONLY AMERICAN SUPPLIERS

WHEEL BEARINGS

ADMA Products, Incorporated of Hudson, Ohio was established to provide advanced self-lubricated bearings and structural components to their industrial customers through the use of powder metallurgy techniques. ADMA works with a wide variety of materials such as steel, stainless steel, bronze, brass and other metals and alloys. Their mission is to apply advanced technology, experience and innovation to deliver cost competitive solutions to our customers. They strive to deliver product improvements and cost reductions to their customers. They employ six people.

INJECTION MOLDS

Industrial Mold & Machine of Twinsburg, Ohio was founded in 1988 with a vision of being a leader in the new found art of precision CNC machining for the Mold and Die industry. Industrial has grown to be a full service manufacturer of high tolerance innovative molds for many segments of the plastics industry. Industrial Mold prides itself in their diversity and ability to design and build a variety of mold types from complex, high-tolerance two shot injection molds to high volume specialty bottle molds and extrusion blow molds which employ state of the art actions and mechanisms to make the most difficult of parts. They have 35 employees.

NECK PAD MATERIAL

PolyOne GLS Thermoplastic Elastomers company, of McHenry, Illinois is a global developer of innovative thermoplastic elastomers (TPEs). GLS offers the largest range of soft-touch TPEs in the industry. Their cutting edge products are found in products for the consumer, appliance, sports and leisure, automotive, lawn and garden, medical, kitchen tool, power tool, personal care and other industrial market segments. Founded in 1979, GLS is the global leader in the supply of application-specific, custom formulated soft and ultra-soft TPEs for injection molding and extruding.

PACKAGING

JIT Packaging Aurora Inc. is an ISO certified provider of industrial, consumer, and point of purchase packaging solutions. In addition to cost effective and creative design solutions, JIT offers a full service warehousing program to its customers. Please visit our website www.jit-pkg.com to further familiarize yourself with our capabilities.

ALL OF US APPRECIATE YOUR BUSINESS!

DECALS

Mark-It Company of Batavia, Illinois produces custom decals for dozens of industries, applications, and products - specializing in permanent ink transfers, industrial decals & labels, and custom decorating solutions. They have 27 employees, and are proud to be celebrating **30 YEARS** in business in 2011.

PLASTICS

Washington Penn Plastic Co. of Washington, Pennsylvania is the largest compounder of custom polyefins in North America with an annual capacity of over 400 million pounds. WPP has been providing material solutions to customers for over 45 years. Today, they offer mineral-filled and glass-reinforced polypropylene compounds that compete with higher cost engineering resins. WPP supplies thermoplastic olefin compounds that offer a complete range of strength, toughness and flexibility. Their goal is to deliver the most cost effective material solutions with industry-leading speed, quality and reliability. They employ about 450 people.

CASTER FORKS

Progressive Machine Die of Macedonia, Ohio was founded in 1965 and now operates in a purpose-built 80,000 sq. ft building that opened in 1999. PMD manufactures stamped metal parts for a variety of industries. Their main focus is on their product line which consists of conduit straps, hangers and other hardware items used in the electrical industry. However, PMD also provides quality stampings for other industries, such as hardware, bed frame, bearings and gas distribution. With their 36 employees, they excel in meeting both exacting engineering criteria and demanding deadlines.

HARDWARE

Ziegler Bolt & Part Co. of Canton, Ohio has been supplying fasteners for over 40 years. Employing over 100 people, they maintain a diverse inventory, with over 72,000 normally stocked items on hand to meet the needs of their customers. Zeigler has 6 locations, their main warehouse in Canton has over 90,000 sq ft of warehouse space holding millions of dollars of inventory to meet practically any fastener needs as well as offer quick, on-time delivery of orders.

All of the companies featured in this flier are American manufacturers. The money you just paid for your new Bone creeper has gone to American manufacturers, American steel, American plastic, even American paper. That money will stay in the country and be used to allow American industry to keep producing goods. Our suppliers alone represent over 800 American employees; people like yourself, your friends and your family members. Your purchase of the Bone helps put bread on all their tables. Pretty good feeling, isn't it?

We believe we speak on behalf of all American industry when we say THANK YOU for buying a product made in America. We hope that this flier has given you even more insight on how important your business is to us, and hope that the next time you are shopping you pick the item with "MADE IN THE USA" stamped on it.

If you like what you have read here, please show this flier to your friends and family. It is up to Americans to keep the American economy running smoothly. Believe in quality and longevity over cheap and disposable. Again, thank you!
